

Power Technique

Powering the future!

Sustainable Productivity

Atlas Copco

Powering the future!

Power Technique's core competency is providing power solutions to thousands of sites all over the world. Our compressors and generators provide vital energy and power for multiple applications and all types of tooling. Our breaker portfolio enables our customers to create the platform for constructing the future. Meanwhile, our light towers and pumps ensure the continued safety, longevity and productivity of our customers.

We are focused on our core technologies of air, power and flow. We will continue to accelerate our efforts in new product development and pioneering the technology of the future. We are proud to offer you premium products that deliver exceptional value. Any product you buy, lease or hire from us will enhance the productivity of your business at the lowest cost of ownership over its lifetime. This is our commitment to you.

Let's start a conversation!

Creating customer value

FORWARD THINKING→

You. Not us

We focus on the customers' needs first. We fully understand that products carry our name but your expectations.

Engineered. Not assembled

We have global research and development capabilities. We offer localized products and make industry leading investments in innovation.

Solutions. Not compromise

We understand that all customers' needs are different. We always offer the best solutions. Options and customization are part of our offering.

Efficient. Not wasteful

We focus on improving the customers' environment and minimizing the impact on the planet. We will never compromise here.

Uptime. Not downtime

We work to the customers' schedule. You never just invest in a product. We offer industry-leading tools to enable you to stay connected to our products.

Leader. Not follower

We bring our customers new and innovative products. It's about looking ahead and staying ahead, to help you do the same.

Atlas Copco

Committed to sustainable productivity

Atlas Copco's Power Technique business area has a forward-thinking philosophy. For us, creating customer value is all about anticipating and exceeding your future needs – while never compromising our environmental principles. Looking ahead and staying ahead is the only way we can ensure we are your long term partner.
